Angeles City, Pampanga, Philippines | (+63) 994-238-7240 | fideljonmagat25@gmail.com

SUMMARY

Full-stack Junior Software Developer skilled in PHP, React/TypeScript, and MySQL/DynamoDB, with daily hands-on use of AI coding assistants (Claude, Codex, ChatGPT) for fast, production-ready. Built REST API integrations, background microservices, and cloud-sync pipelines using AWS S3, DynamoDB, and NSSM.

EXPERIENCE

Servo IT Solutions, Angeles City, Pampanga

May 2025 – Present

Junior Software Developer

- **Shipped Xenia Online**, a background microservice syncing reservation data between on-premise and cloud servers for guest pre-arrival and online check-in, integrating with DynamoDB via REST/HTTP APIs in C#/NET.
- **Built Halo Protocol**, a lightweight background service (run via NSSM) that eliminates repetitive tech-support work by automatically running a diagnostic query across every client deployment whenever a critical bug is identified — cutting manual per-client triage time.
- **Built and integrated a Node.js image-upload service** with RESTful APIs to store user-submitted files in AWS S3, centralizing data from multiple sources into the sync pipeline.
- **Use AI coding assistants (Claude, Codex, ChatGPT) daily** to accelerate full-stack implementation — writing backend APIs, refactoring UI, and debugging faster — while keeping logic, architecture, and code-quality decisions self-directed rather than AI-dictated.
- **Refactor React/TypeScript UI components** for consistency and maintainability, and reduce load time and technical debt through targeted backend refactoring.
- **Participate in Agile sprint planning, code reviews, and cross-team collaboration**, communicating progress and blockers proactively.

Servo IT Solutions, Angeles City, Pampanga

Jun 2024 – May 2025

Associate Software Developer

- **Delivered the Compliance Accounting System (CAS) integration** (PHP, JavaScript, jQuery) connecting the web app to the Accounting System for BIR tax compliance — a client-facing, production feature generating Sales Journal Entries, Receipt Journal Entries, and receipts used live across the client base.
- **Built responsive, reusable front-end components** (HTML, CSS, JavaScript) for the Banquet System UI, prioritizing simple, maintainable component design.

Servo IT Solutions, Angeles City, Pampanga

Feb 2024 – May 2024

Software Developer Intern

- **Retained as a full-time hire** after this final-year OJT/internship, based on performance and demonstrated potential.
- **Supported senior developers in enhancing reports and queries** for the Banquet System using MySQL.
- **Assisted in improving modules and functions** across the front-end and backend using PHP, Bootstrap, CSS, and HTML.

TECHNICAL SKILLS

- **Languages & Frameworks:** PHP, JavaScript, TypeScript, Next JS, HTML5, CSS3, jQuery, Node.js
- **APIs & Integrations:** REST/HTTP API design and integration, third-party service integration
- **Data Layer:** MySQL (joins, temporary tables, stored procedures), NoSQL (DynamoDB)
- **Cloud:** AWS S3, DynamoDB, Supabase, Firebase, Vercel, Cloudflare
- **Tools & Practices:** Git, GitHub, GitHub Actions (CI/CD)
- **OS:** Windows

EDUCATION

Pampanga State Agricultural University, Magalang, Pampanga

Sep 2020 – Jun 2024

Bachelor of Science in Information Technology (BSIT)

Completed final-year internship at Servo IT Solutions (Feb–May 2024); retained full-time based on performance.
